ESTONIAN WEATHER REPORT, 18-23 JULY

Sovetskaya Estoniya, No 169, 20 Jul 49

According to the Forecasting Bureau of the Administration of Hydrometeorological Service Estonian SSR, the weather continued clear during the night of 18 July. On 19 July, local showers fell in southern regions. Night temperature on 19 July was 7-11 degrees, and daytime temperature was 20-24 degrees.

During the next few days the weather will be warm, with varying cloudiness, local showers, and thunderstorms. The most intensive thunderstorms will occur from 21 to 22 July. Daytime temperature will be 22-26 degrees.

Sovetskaya Estoniya, No 170, 21 Jul 49

The weather has been dry in the northern regions for the past few days but there have been local showers in the southern regions. Night temperature has generally been from 9 to 13 degrees, and day temperature 20-23 degrees.

Changing cloudiness, showers, and thunderstorms are expected on 21-22 July. Dry and generally clearing weather is expected on 23 July. Day temperature will be 20-24 degrees and night temperature 10-15 degrees.

' Sovetskaya Estoniya, No 171, 22 Jul 49

The weather on 21 July was warm and cloudy throughout the republic, with scattered showers and thunderstorms. Cloudy weather with clearing, light rains, and local thunderstorms may be expected 22-23 July. The wind will be moderate east and northeast. Temperature during the day will be 18-22 degrees.

Starting 24 July, the weather will be dry with continued clearing and higher temperatures.
